ABOUT THIS CAR

Air Conditioner, Alarm Immobiliser, Carpet Set, Cartrack, Electric Windows, Power Steering, Remainder of Warranty, Service History. The 2026 Nissan Magnite Move Panel Van is a smart, practical and cost-effective commercial vehicle designed for businesses that need everyday reliability, excellent fuel economy and useful load-carrying capability without the bulk of a traditional large panel van., , Based on the popular Nissan Magnite platform, the Magnite Move combines the comfort and easy driving characteristics of a compact SUV with a dedicated commercial load area. This makes it a great choice for small businesses, sales representatives, delivery companies, technicians, couriers, florists, pharmacies, catering businesses, service providers and anyone needing a compact work vehicle that is economical to operate and easy to manoeuvre., , Unlike the standard five-seater Magnite, the Magnite Move is configured as a panel van, with the rear seating area converted into a practical cargo space. This gives business owners the flexibility to carry stock, tools, parcels, equipment and other work-related items securely while still enjoying a comfortable front cabin., , The rear load section is separated from the driver and passenger area by a protective division, helping to keep goods contained in the cargo area. The rear side sections are also designed with security and practicality in mind, making the Magnite Move far better suited to commercial use than a normal passenger vehicle., , One of the biggest advantages of the Magnite Move is its compact size. Larger commercial vehicles can sometimes be difficult to manoeuvre through busy city centres, shopping complexes, narrow streets and parking areas. The Magnite Move is much easier to drive in these environments, making it especially well suited to businesses that spend most of their time operating in town or doing multiple deliveries throughout the day., , Under the bonnet, the Magnite is powered by Nissan's economical 1.0-litre petrol engine. This engine is designed to provide practical everyday performance while keeping fuel consumption and running costs as manageable as possible. For businesses travelling high monthly mileage, fuel economy can make a major difference to operating expenses, and the Magnite Move gives owners a useful alternative to heavier and more expensive commercial vehicles., , The naturally aspirated 1.0-litre engine produces approximately 53 kW of power and 96 Nm of torque, providing enough performance for everyday urban use while remaining focused on efficiency. Its lightweight body and compact dimensions allow the engine to perform well during normal business driving, particularly in built-up areas and on daily delivery routes., , Another important advantage is the Magnite's 205 mm ground clearance. This is higher than many conventional small hatchbacks and gives the vehicle added confidence when travelling over uneven roads, speed bumps, gravel surfaces or entrances to industrial sites. Although it is not intended to replace a serious off-road vehicle, the extra ground clearance is a useful benefit for South African driving conditions., , Inside the front cabin, the driver and passenger benefit from a comfortable and modern environment. The Magnite has been designed to feel more like a passenger vehicle than a traditional commercial van, making long working days far more pleasant., , Depending on the exact specification, features may include air-conditioning, power steering, electric windows, central locking, touchscreen infotainment, Bluetooth connectivity and smartphone integration. These features are especially valuable for sales representatives, service technicians and business owners who spend a large amount of time on the road., , The elevated driving position gives the driver good visibility, helping with traffic awareness and making parking easier. The steering is light and responsive, while the compact dimensions make the Magnite Move easy to handle in tight spaces., , For businesses, practicality is the most important consideration, and this is where the Magnite Move stands out. The panel-van conversion allows the rear area to be dedicated to cargo rather than passengers. This means there is considerably more usable space for stock and equipment than you would normally have in a small passenger vehicle., , The cargo section is ideal for carrying boxes, tools, smaller machinery, promotional stock, spare parts, parcels or other everyday business items. The separation between the load area and front occupants also helps keep the cabin neat and organised., , Security is another important consideration when carrying valuable goods or equipment. The enclosed rear area reduces visibility into the cargo compartment and helps businesses transport goods more discreetly than they could in an ordinary hatchback or SUV., , Because the Magnite Move is based on a compact platform, it can also be an excellent branding vehicle. Businesses can apply logos, contact details and company graphics to the bodywork, turning the vehicle into a mobile advertisement while it travels between clients., , The Magnite's modern styling gives it a professional and attractive appearance on the road. Its bold front grille, sculpted body lines and elevated stance help it stand out from more traditional entry-level commercial vehicles., , For companies that interact directly with customers, appearance can be important. The Magnite Move allows a business to arrive at a client's premises in a vehicle that looks

modern and professional while still providing the functionality required for everyday work., , Running costs are often one of the biggest concerns when choosing a business vehicle. The Magnite Move is designed to remain affordable not only to purchase, but also to operate., , Its small petrol engine helps reduce fuel usage, while the compact tyres and lighter overall construction can help keep maintenance and replacement costs lower than those of larger commercial vehicles., , For a business operating several vehicles, these savings can become significant over time. A fleet of economical compact panel vans can potentially reduce monthly fuel expenses while still meeting everyday delivery and transport requirements., , The Magnite Move is therefore particularly appealing to start-up businesses and growing companies that need a dependable commercial vehicle but do not want the higher purchase price and running costs associated with a large van or bakkie., , The 2026 Nissan Magnite also benefits from Nissan's established dealership and service network. Having access to professional servicing, genuine parts and manufacturer support gives business owners added confidence, especially when the vehicle plays an important role in daily operations., , The standard Nissan Magnite range is offered with a 6-year 150,000 km warranty and a 3-year 30,000 km service plan, although customers should confirm the exact warranty and service-plan conditions applicable to the Magnite Move panel-van conversion before purchase., , Regular servicing is essential for any business vehicle, particularly one that operates every day. Keeping the vehicle maintained according to manufacturer requirements helps improve reliability, preserve resale value and reduce the risk of unnecessary downtime., , The Nissan Magnite Move is also ideal for companies that need a vehicle for employees. Its compact size makes it easy for different drivers to operate, while its simple layout and comfortable driving position make it suitable for daily commercial use., , It can work particularly well for , , Courier and delivery businesses transporting parcels and small goods., , Technicians and maintenance companies carrying tools and equipment., , Pharmacies and medical suppliers delivering medication and supplies., , Florists and event companies transporting smaller arrangements and d cor., , Sales representatives carrying samples, promotional material and stock., , Cleaning companies transporting cleaning products and equipment., , Catering businesses handling smaller deliveries and supplies., , IT and telecommunications companies transporting equipment and installations., , Small retail businesses moving stock between branches or customers., , Entrepreneurs looking for an affordable and practical first business vehicle., , The Magnite Move can also be useful for larger companies that require economical fleet vehicles for branches, technicians or representatives., , One of the strongest selling points of the Magnite Move is that it gives businesses a vehicle that can work during the week without feeling uncomfortable or cumbersome to drive., , It offers the practicality of a commercial vehicle while retaining the comfort, styling and easy handling associated with the Magnite passenger range., , For an owner-driver, this can be especially appealing because the vehicle remains pleasant to use even outside normal working hours., , The combination of a practical rear cargo area, low running costs, modern appearance and Nissan support makes the 2026 Nissan Magnite Move Panel Van a strong option for South African businesses., , At NTT Nissan Secunda, we understand that purchasing a business vehicle is about more than simply choosing a car. The vehicle needs to work for you, your employees and your business every day., , We offer finance through all major banks and can assist with trade-ins, finance applications and vehicle delivery arrangements., , Our team will gladly help you find the right solution based on your business requirements and budget., , We also offer competitive trade-in values and can assist customers who are upgrading from an existing passenger or commercial vehicle., , Whether you are buying your first company vehicle or adding another vehicle to an established fleet, the Magnite Move offers a practical and economical solution., , Why choose the 2026 Nissan Magnite Move Panel Van?, , Compact and easy to drive., , Dedicated commercial cargo area., , Panel-van configuration rather than a five-seat passenger layout., , Security partition between front cabin and rear load area., , Economical 1.0-litre petrol engine., , Low everyday running costs., , Excellent manoeuvrability., , Good ground clearance., , Comfortable front cabin., , Modern Nissan styling., , Ideal for small businesses and fleet use., , Perfect for urban deliveries and daily commercial driving., , Supported by Nissan's dealership network., , Finance available through all major banks., , Trade-ins welcome., , Nationwide delivery options available., , The 2026 Nissan Magnite Move Panel Van is a practical commercial vehicle for businesses that want to keep operating costs under control without sacrificing comfort, reliability or professional appearance., , It is compact enough for busy town driving, economical enough for everyday business use and practical enough to handle the stock, equipment or parcels required for a full working day., , If your business needs a smart, affordable and versatile commercial vehicle, the Magnite Move is well worth considering., , NTT Nissan Secunda, , Finance available through all major banks., , Trade-ins welcome., , Nationwide delivery options available., , All advertised prices are subject to in-house finance approval and exclude dealer fees., , T's

C's apply., , Specifications, features, load capacity, warranty and service-plan details may vary according to the exact model and panel-van conversion. Please confirm the final vehicle specification with NTT Nissan Secunda before purchase.
