ABOUT THIS CAR

Air Conditioner, Alarm Immobiliser, Alloy Wheels, Auto lights, Bluetooth, Carpet Set, Cartrack, Central Locking, Electric Windows, Power Steering, Remainder of Service Plan, Reverse camera, Satellite Navigation, Smart key, Sunroof, Window tint. Exterior Design and Styling, , The 2026 Nissan Tekton 1.3T Acenta DCT is a modern SUV that combines bold styling, practical proportions and contemporary design. Created for motorists who want a vehicle that looks sophisticated while remaining suitable for everyday use, the Tekton features a confident road presence, sculpted body panels and distinctive lighting details., , At the front, LED headlights and signature LED daytime running lights provide a contemporary appearance while helping improve visibility. The vehicle's sculpted bonnet and purposeful front styling give it a strong character, while the overall design creates a balance between sporty appeal and family-friendly practicality., , The side profile features pronounced wheel arches and stylish alloy wheels that enhance the SUV's stance. The Acenta specification upgrades to 18-inch alloy wheels, providing a more premium appearance than the steel wheels fitted to the entry-level automatic model., , At the rear, modern lighting details, a rear window defogger and a high-mounted LED stop lamp contribute to the vehicle's distinctive design. A shark-fin antenna adds a stylish finishing touch., , Additional exterior convenience features include electrically folding exterior mirrors, helping make parking in confined spaces easier. The panoramic opening glass roof with an electrically operated cover is another highlight, allowing occupants to enjoy more natural light and an open-air atmosphere when conditions permit., , Overall, the Tekton Acenta delivers an attractive SUV design suited to urban environments, suburban driving and longer journeys., , 2. Engine Performance and Transmission, , The Nissan Tekton 1.3T Acenta DCT is powered by a 1.3-litre, four-cylinder turbocharged petrol engine with a displacement of 1,333 cc. It produces approximately 115 kW of power and 260 Nm of torque, providing responsive performance for everyday driving., , The turbocharger helps the engine deliver strong pulling power at relatively low engine speeds. This is particularly useful when accelerating from traffic lights, merging onto highways or overtaking slower vehicles., , Power is delivered to the front wheels through a six-speed dual-clutch automatic transmission with a wet-clutch arrangement and electronic gear selection. The DCT is designed to provide quick, efficient gear changes without requiring the driver to operate a conventional clutch pedal., , For motorists who frequently travel through busy urban areas, the automatic transmission offers convenience in stop-start traffic. On open roads, the transmission helps maintain smooth progress while providing suitable gearing for acceleration and cruising., , Steering-mounted paddle shifters allow the driver to select gears manually when desired, adding greater control during overtaking or on winding roads., , The front-wheel-drive configuration is well suited to normal road use, daily commuting and family travel. The published acceleration figure is approximately 9.9 seconds from 0 to 100 km h, while the claimed top speed is around 198 km h., , These performance figures make the Tekton Acenta a capable option for buyers who want practical SUV functionality combined with a responsive turbocharged engine., , 3. Fuel Economy and Efficiency, , The 2026 Nissan Tekton 1.3T Acenta DCT is designed to balance performance with reasonable fuel consumption. Its claimed combined fuel consumption is approximately 6.3 litres per 100 kilometres, although actual results will depend on driving habits, traffic conditions, terrain and vehicle loading., , The turbocharged engine provides useful power without requiring a larger-capacity engine, while the six-speed transmission helps the vehicle operate efficiently across different driving conditions., , A 50-litre fuel tank provides practical capacity for daily commuting and longer road trips. For families and professionals who regularly travel between home, work and other destinations, this can help reduce the frequency of fuel stops., , Drivers can support better fuel efficiency by accelerating smoothly, maintaining correct tyre pressures and ensuring that the vehicle receives regular servicing., , 4. Interior Comfort and Cabin Design, , Inside, the Nissan Tekton Acenta DCT provides a modern cabin designed around comfort, practicality and accessible technology. Its interior combines a contemporary dashboard, convenient storage areas and thoughtfully positioned controls., , The Acenta features blue-and-black semi-PVC upholstery, giving the cabin a distinctive appearance while providing a practical seating surface for everyday use. The front seats offer manual adjustment, allowing the driver and passenger to find comfortable seating positions., , The driver's seat includes six-way manual adjustment, incorporating sliding, reclining and height adjustment. The front passenger seat provides manual adjustment for sliding and reclining., , A centre console with an armrest adds comfort during longer journeys, while the rear cabin includes dedicated air vents to help distribute airflow to passengers seated behind the driver and front passenger., , The panoramic glass roof is an important feature of the Acenta specification. It allows natural light into the cabin and creates a more open atmosphere, particularly appreciated during daytime

journeys., , The interior also includes touch-operated LED cabin lights, rear reading lights and a digital instrument display. These features contribute to a modern environment without sacrificing everyday functionality., , With seating for five occupants, the Tekton is suitable for couples, small families and professionals who need a versatile vehicle for commuting and leisure travel., , 5. Infotainment and Connectivity, , Technology is a major part of the Nissan Tekton Acenta's appeal. The vehicle features a 10.1-inch central infotainment touchscreen, providing access to compatible smartphone applications, audio entertainment and communication functions., , Wireless Apple CarPlay and Android Auto allow compatible smartphones to connect without requiring a physical cable. Drivers can access supported navigation applications, make calls, listen to music and use selected messaging functions through the infotainment system., , A 10-inch-class digital instrument display provides important driving information in a modern format. It complements the central touchscreen and makes essential vehicle information easier to view while driving., , The Acenta specification includes a four-speaker audio system with additional tweeters, providing an improved listening experience compared with the entry-level audio arrangement., , Wireless smartphone charging is another convenient addition, allowing compatible devices to charge without connecting a cable. This is particularly useful for motorists who rely on their phones for navigation and communication throughout the day., , The vehicle also includes a 12-volt power outlet at the front of the cabin and additional charging provisions for rear passengers, depending on the supplied specification., , Together, these features make the Tekton Acenta suitable for modern motorists who value smartphone integration, entertainment and convenient access to digital services., , 6. Climate Control and Convenience Features, , The Nissan Tekton Acenta DCT features dual-zone automatic climate control, allowing the driver and front passenger to select individual temperature preferences., , Unlike a basic manual air-conditioning system, automatic climate control is designed to maintain the selected cabin temperature with less frequent manual adjustment. This is particularly useful during South Africa's warmer months and on long journeys., , Rear air vents help distribute cooled air to passengers in the back, contributing to overall cabin comfort., , The Acenta also includes push-button engine starting and an intelligent key system, making it easier to enter and start the vehicle without repeatedly handling a conventional key. Approach-unlock and walk-away-lock functions add further convenience., , An automatic-dimming interior rear-view mirror helps reduce glare from headlights behind the vehicle at night, while electrically folding exterior mirrors provide practical assistance when parking., , The electric parking brake and Auto Hold function are useful in traffic. Auto Hold can help keep the vehicle stationary when stopped, reducing the need to continuously press the brake pedal under suitable operating conditions., , Cruise control and a speed limiter also assist with maintaining a selected speed during suitable driving situations., , These features make the Tekton Acenta a practical choice for daily commuters and motorists who spend considerable time on the road., , 7. Safety and Driver Assistance, , Safety is an important consideration in the Nissan Tekton range. The Acenta includes six airbags covering the driver, front passenger and relevant side and curtain areas. These airbags are designed to help protect occupants in certain collisions., , The braking and stability systems include anti-lock braking (ABS), electronic brake-force distribution (EBD), emergency brake assistance and electronic stability control. Together, these technologies help support braking performance and vehicle stability in appropriate driving conditions., , Hill Start Assist helps reduce the likelihood of rolling backwards when moving away on an incline. Tyre Pressure Monitoring helps alert the driver to detected tyre-pressure problems, while ISOFIX child-seat anchorage points support the installation of compatible child restraints., , For parking, the Acenta benefits from rear parking sensors and a rear-view camera. Its multi-view camera system provides additional visual assistance when manoeuvring in confined spaces, helping drivers assess their surroundings when parking or navigating tight areas., , The Acenta also includes a blind-spot warning system, which can alert the driver to vehicles detected in designated blind-spot areas., , It is important to distinguish these features from the more extensive driver-assistance package available on the higher Tekna specification. Features such as lane-keeping assistance, front collision warning and automatic emergency braking should be confirmed against the specific vehicle before being advertised as standard Acenta equipment., , Driver-assistance systems support the driver but do not replace careful observation, safe following distances or responsible driving., , 8. Space, Practicality and Luggage Capacity, , The Nissan Tekton Acenta offers the flexibility expected from a modern family SUV. Its five-door layout makes entry and exit convenient, while the five-seat cabin provides practical passenger accommodation., , The vehicle measures approximately 4,349 mm in length, 1,815 mm in width and 1,674 mm in height, including the roof rails. Its ground clearance of approximately 212 mm provides useful clearance over ordinary road obstacles and uneven surfaces., , Luggage capacity is approximately 518 litres up to the parcel shelf, providing room for groceries, suitcases,

shopping bags and other everyday items., , When the rear seats are folded, the available cargo volume increases to approximately 1,789 litres, offering additional flexibility for transporting larger items., , This adaptable layout makes the Tekton suitable for family holidays, weekend outings, sporting equipment and everyday shopping. A full-size spare wheel is also listed in the specifications, providing a practical advantage when dealing with certain tyre emergencies., , The approximately 10.8-metre minimum turning-circle diameter helps make manoeuvring more manageable in urban environments and parking areas., , 9. Suspension, Handling and Braking, , The Nissan Tekton uses MacPherson strut front suspension and a rear twist-beam suspension system with coil springs. This configuration is designed to provide a practical balance between ride comfort, stability and efficient use of interior space., , The suspension helps the vehicle cope with everyday road conditions, including typical urban surfaces and highway journeys. Its elevated driving position also gives occupants a commanding view of the road., , The braking system features ventilated front disc brakes and rear disc brakes, supported by ABS, EBD, emergency brake assistance and electronic stability control., , Electric power steering assists with low-speed manoeuvring while supporting predictable control during normal driving., , Although the Tekton's ground clearance is useful on uneven roads, it remains a front-wheel-drive road-oriented SUV rather than a dedicated off-road vehicle. Drivers should therefore exercise caution on challenging terrain., , 10. Warranty and Ownership Benefits, , For South African buyers, the 2026 Nissan Tekton Acenta DCT is listed with a six-year or 150,000-kilometre mechanical warranty and a four-year or 60,000-kilometre service plan, subject to Nissan's terms and conditions., , The recommended service interval is 15,000 kilometres or 12 months, whichever comes first., , These provisions can make ownership easier to plan by helping buyers understand routine servicing requirements and the period of applicable mechanical warranty protection., , Prospective owners should confirm the exact service-plan inclusions, warranty conditions and final pricing with an authorised Nissan dealer., , Conclusion, , The 2026 Nissan Tekton 1.3T Acenta DCT combines modern SUV styling, turbocharged performance, automatic transmission convenience and a well-equipped cabin. Its 1.3-litre turbocharged engine delivers approximately 115 kW and 260 Nm, while the six-speed dual-clutch gearbox provides responsive performance for everyday commuting and longer journeys., , The Acenta specification stands out with its 18-inch alloy wheels, panoramic glass roof, dual-zone automatic climate control, wireless smartphone charging, digital instrument display and multi-view camera system. Practical luggage capacity, five-seat accommodation and a useful collection of safety features further strengthen its appeal., , For buyers seeking an SUV that balances comfort, technology, performance and everyday usability, the Nissan Tekton Acenta DCT offers an attractive middle-ground specification. It provides many desirable premium conveniences while retaining the practicality required for family life, professional use and weekend travel., , Specifications reflect published South African model information. Equipment and availability may vary by production date or market; confirm the exact specification with Nissan South Africa or an authorised dealer before purchase.
